# Shipbuilding, repair, and sustainable innovation

For over 90 years, Sjøby Shipyard has been a pioneer in the maritime industry, shaping trends and driving innovation. Founded in 1931 by Arthur Christian Jørgensen, the shipyard initially focused on marine engine repair and manufacturing. By the late 1940s, production had expanded to shipbuilding, with the first dry dock completed in 1967.

Today, Sjøby Shipyard offers comprehensive ship repair and maintenance services in three dry docks, the largest of which measures 140 x 24 x 6 meters. Their expertise extends to a diverse range of vessels, including naval ships, tankers, cargo vessels, tugs, barges, offshore vessels, and various specialized craft.

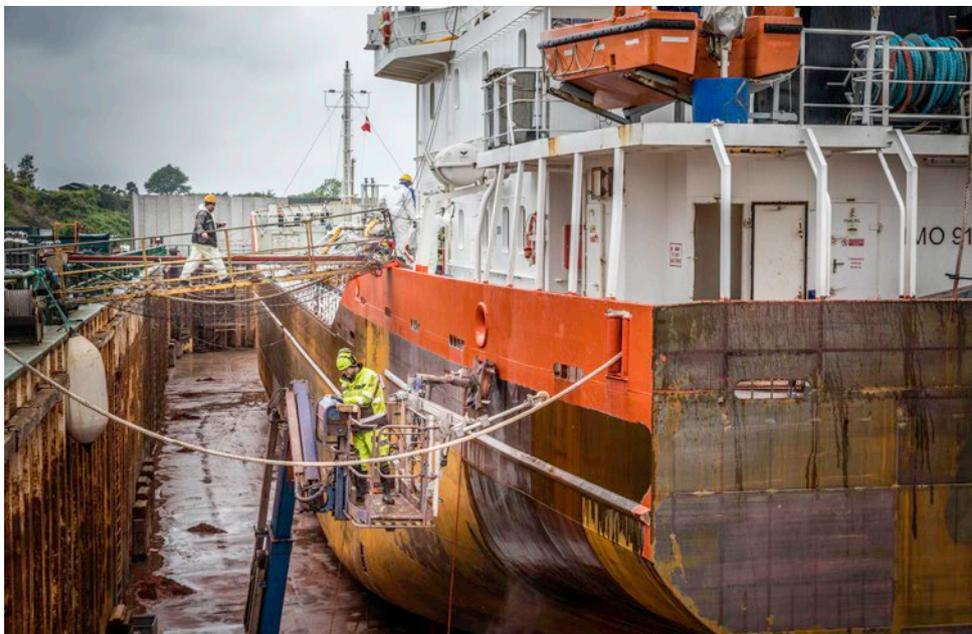

Beyond repair and maintenance, Sjøby Shipyard has delivered over 110 new builds across various categories, such as fishing boats, ferries, tankers, cargo ships, and special-purpose vessels.

Sjøby Shipyard is committed to delivering superior craftsmanship and timely service. In recent years, the shipyard has also prioritized sustainability in marine transportation by installing innovative propulsion solutions, including electrification and green fuels. This focus is evident in their construction of semi and fully battery-powered ferries, most notably the fully electric ferry "Ellen," which has been operating between Sjøby, Ærø, and Fynshav on Als since 2019.

# The history of Søby Shipyard

# Søby Værft A/S har også valgt Concept Data som samarbejdspartner på Uniconta-projekt

## Hvad er Uniconta?

Uniconta er et avanceret regnskabsprogram, der opfylder fremtidens krav til digitalisering og skalerbarhed. Det tilbyder omfattende tilpasningsmuligheder, herunder tilføjelse af egne felter og ændringer af skærmopsætning. Derudover giver moderne API-integrationer adgang til Uniconta fra andre programmer.

## Hvorfor vælge Concept Data?

**Dedikeret supportteam:** Vores supportteam er klar til at hjælpe dig med alle dine Uniconta-behov.

**Uniconta kursuscenter:** Vi tilbyder specialiserede kurser, så du kan få mest muligt ud af Uniconta.

**Eget udviklingsteam:** Vores udviklingsteam sikrer, at vi kan tilpasse Uniconta til dine specifikke behov.

**Erfaring:** Med mere end 8 års erfaring med Uniconta er vi eksperter på området.

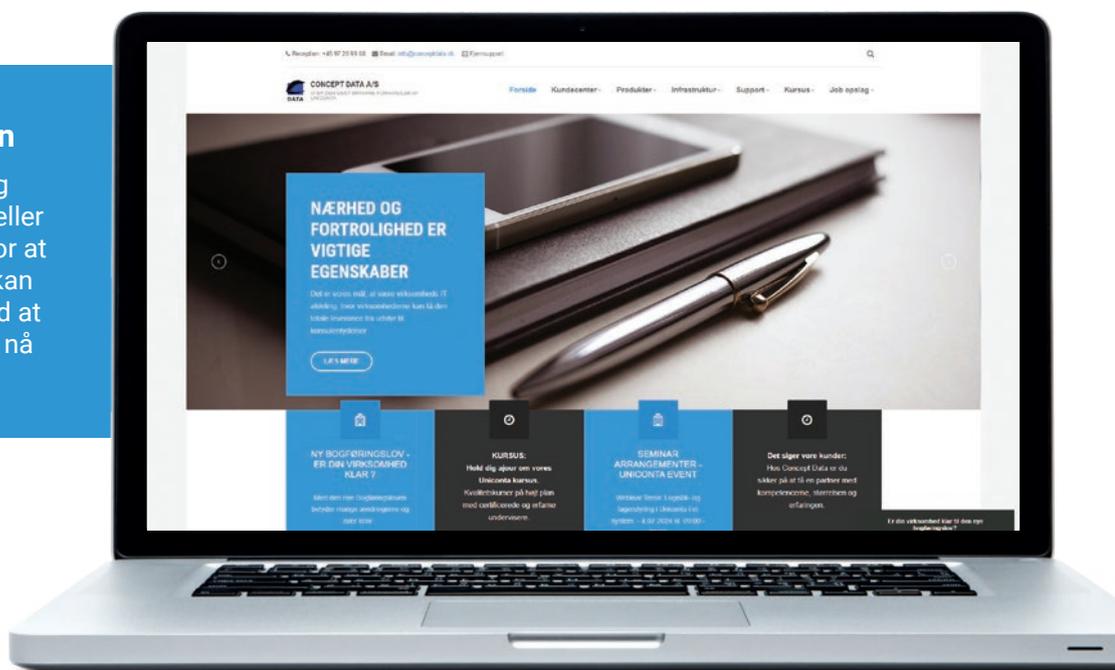

**Sparringspartner:** Vi er en pålidelig partner, der hjælper dig med at optimere din virksomheds regnskabsprocesser.

## Bliv en del af succesen

Kontakt Concept Data i dag på [info@conceptdata.dk](mailto:info@conceptdata.dk), eller ring til os på 97 26 99 88 for at høre mere om, hvordan vi kan hjælpe din virksomhed med at implementere Uniconta og nå nye højder.

## Located in the heart of the Baltic Sea

Søby Shipyard is located on the island of Ærø in Denmark and offers a unique combination of shipbuilding, repair, and eco-friendly technology.

Søby Shipyard is easily accessible by ferry from a variety of locations. The shipyard itself is situated directly next to the ferry dock in Søby Harbour.

In addition to its convenient location, Søby Shipyard offers a number of features that make it an attractive option for customers. The shipyard has a deepwater harbour, experienced staff, and a commitment to innovation and green fuel solutions. Søby Shipyard is also expanding its facilities to accommodate future growth.

## Warehouse facilities

Søby Shipyard offers extensive warehouse facilities to store the shipyards customers parts and equipment. The shipyard has a heated warehouse 730 square meters big and can accommodate 200 pallets of parts. There is also an unheated warehouse of 360 square meters that can hold an additional 250 pallets. Furthermore there is a third, 70 square meter warehouse specifically for storing paint that can hold 80 pallets. In total, there is space for over 10,000 different parts.

The shipyard's warehouse is conveniently located and easily accessible by land and sea. The shipyard is visited several times daily by supply trucks and couriers from the mainland. This ensures that it's customers won't experience any delays due to missing parts or equipment.

# Visit Ærø

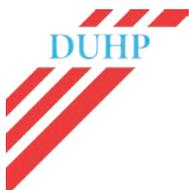

Søby Shipyard is more than just business. Ærø, a charming island in the Baltic Sea, offers a delightful escape from the hustle of everyday life. With its picturesque landscapes, rich history, and vibrant culture, Ærø has something to captivate every visitor.

The towns and villages has a unique charm with their colorful houses, cobblestone streets, and historic architecture. Explore the island's main town, Marstal, with its maritime museum and lively harbour, or wander through the quaint streets of Ærøskøbing, a UNESCO World Heritage site.

Golf on Ærø offers a unique and unforgettable experience for enthusiasts of all levels. Located on the northwestern tip of the island, Ærø Golf Club has a stunning 18-hole seaside course with breathtaking 360-degree views of the Baltic Sea and the South Funen Archipelago.

# Dry docks

Søby Shipyard has three state-of-the-art dry docks, each equipped to handle a diverse range of vessel types and sizes. This comprehensive dry dock capacity allows Søby Shipyard to cater to the specific needs of each client, ensuring efficient and high-quality repairs and maintenance.

## DOCK III

The largest of the three dry docks, Dock III, has expansive dimensions including an azimuth pit that enables it to accommodate most vessels. Whether it's a tanker, a dry cargo vessel, a specialized offshore vessel, or similar, Dock III has the capacity and capabilities to handle any repair or maintenance challenge.

## DOCK II

Primarily dedicated to repairs, Dock II enables drydocking for vessels such as ferries, yachts, barges, and offshore wind service vessels. Equipped with experienced personnel, Dock II ensures that even the most challenging repairs are carried out with efficiency.

## DOCK I

The oldest of the three dry docks, Dock I retains its relevance and value within Søby Shipyard's operations. Its well-maintained facilities and experienced staff make it ideal for a variety of vessel types.

## Steel Services

- Steel structures
- Ship repairs [steel, piping, outfitting]
- 3D scanning
- Engineering [including 3D modeling]

Services both at customer facilities as well as in our 2 workshops in Poland [Szczecin and Gdynia].

# Engine repair

Engine work is in the DNA of Søby Shipyard. With a legacy of over 90 years in the maritime industry. The shipyard has honored this with its expertise in marine engine repair, making it a trusted partner for shipowners and operators worldwide.

## COMPREHENSIVE ENGINE SERVICES

The dedicated team of skilled technicians and engineers offers a comprehensive range of engine services, including:

 **Overhaul and repair:** The shipyard specialize in the overhaul, repair, and rebuilding of any marine engine service and mechanical system. With in-house capabilities allowing it to tackle even the most complex engine issues, ensuring optimal performance and reliability.

 **Turbocharger and fuel equipment overhaul:** The shipyard understand the critical role that turbochargers and fuel equipment play in engine performance. Their experts meticulously overhaul these components, restoring them to peak efficiency and ensuring smooth operation.

 **Pipe system and pump overhaul:** The shipyards expertise extends to the repair and overhaul of all types of pipe systems and pumps, ensuring that its customers vessel's critical systems are in top working order.

 **Hydraulic installations and propeller repair:** The shipyard offer comprehensive hydraulic installation and propeller repair services, ensuring seamless integration and optimal performance of their customers vessel's propulsion system.

 **Complete propulsion system installations:** The shipyard's team of engineers can handle the installation of complete propulsion systems, ensuring that their customers vessel is equipped with the latest technology and optimized for peak performance.

# Retrofitting solutions

The shipyard understand that every vessel is unique, and their experienced team collaborates closely with their customers to develop tailored conversion and retrofitting plans that align with their specific goals and requirements. Whether it's modernizing outdated systems, enhancing efficiency, or adapting to new regulations, the shipyard has the expertise and resources to transform their customers vision into reality.

## COMPREHENSIVE RETROFITTING SERVICES:

The shipyards comprehensive conversion and retrofitting services encompass a wide range of areas, including:

-  **Engine upgrades and modifications:** The shipyard can upgrade the customers vessel's engine to a more fuel-efficient or environmentally friendly model, reducing emissions and operating costs.
-  **Electrification solutions:** The shipyard offer state-of-the-art electrification solutions, including battery-powered propulsion systems, to reduce emissions and enhance sustainability.
-  **Interior and exterior refurbishments:** The shipyard can modernize its customers vessel's interior and exterior spaces, creating a more comfortable and functional environment for crew and passengers.
-  **Hull and structure modifications:** The shipyard can modify its customers vessel's hull and structure to improve stability, increase cargo capacity, or enhance maneuverability.
-  **System upgrades and installations:** The shipyard can upgrade or install new systems, such as navigation, communication, and safety systems, to enhance its customers vessel's capabilities.

# Your partner for shipbuilding

With over 90 years of experience, Søby Shipyard is still a force in shipbuilding in the Baltic Sea region. We specialize in building smaller vessels like crew transport vessels (CTVs), fishing boats, ferries, pilot boats, tugs, smaller military vessels, and coasters.

The shipyard understand that shipbuilding is a significant investment, and we are committed to

providing our clients with the best possible value. Our transparent pricing and open communication ensure that you are always informed and involved in the shipbuilding process. We strive to build long-lasting relationships with our clients, based on trust, transparency, and mutual respect.

# Sustainability

At Søby Shipyard, we are committed to environmental, social, and governance (ESG) principles and strive to integrate sustainability into every aspect of our operations. Our dedication to responsible practices is reflected in our ISO certifications and our ongoing efforts to minimize our environmental impact and contribute to a greener maritime industry.

## ENVIRONMENTAL STEWARDSHIP

We recognize the importance of protecting our planet and are committed to reducing our carbon footprint. We have initiated various initiatives to minimize waste, conserve energy, and reduce emissions throughout our shipbuilding and repair processes. Our focus on sustainable materials and technologies ensures that our customers vessels are not only efficient but also environmentally friendly.

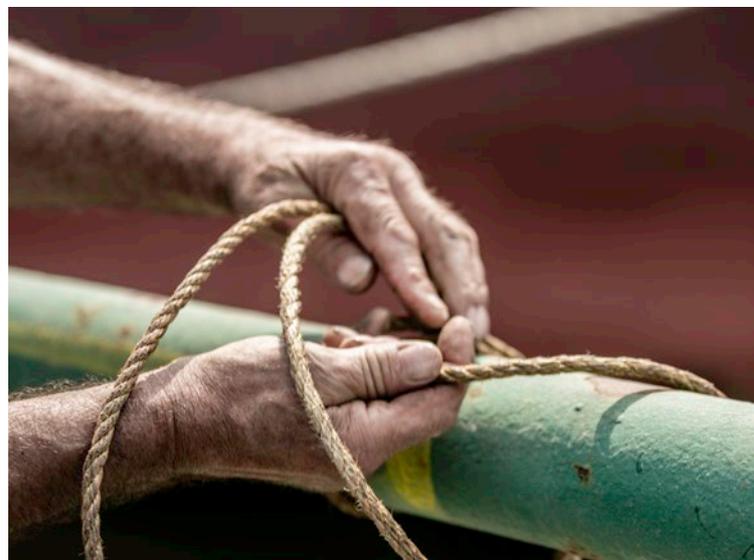

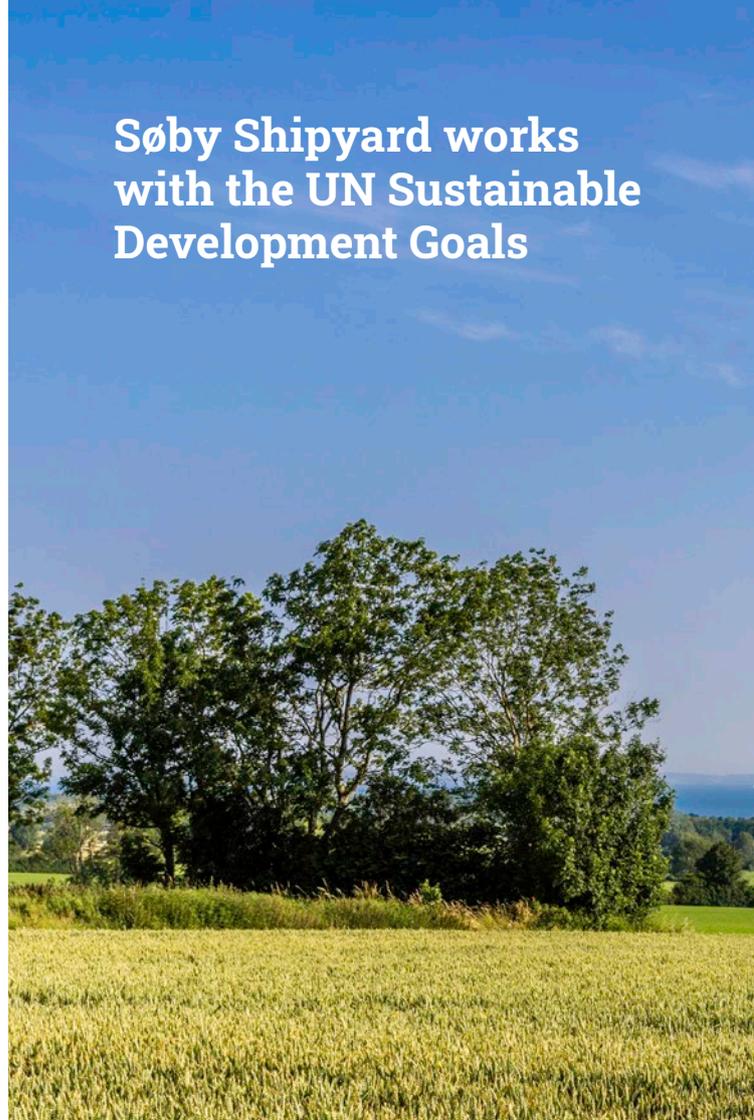

## SOCIAL RESPONSIBILITY

We value our employees and the communities we serve. We strive to create a safe and inclusive workplace where everyone feels valued and respected. We also actively engage with local communities, supporting initiatives that promote education, health, and well-being.

## GOVERNANCE

We adhere to the highest standards of corporate governance, ensuring transparency, accountability, and ethical decision-making in all our operations. We are committed to complying with all relevant laws and regulations and strive to exceed industry standards for safety and quality.

# Zero-emission maritime future

At Søby Shipyard, we're leading the charge towards a zero-emission maritime future. We work hand-in-hand with our clients, offering innovative and green propulsion solutions that are transforming the industry.

## OUR PROVEN TRACK RECORD

We have a proven track record of successfully building and retrofitting vessels with zero-carbon emission technology. Here are a few examples of our groundbreaking work:

**Fully electric ferry:** We built "Ellen," the world's first fully electric car and passenger ferry, which has been operating successfully since 2019 and holds a world record for distance traveled on a single charge.

**Hybrid propulsion:** We have integrated hybrid propulsion systems into numerous vessels, combining diesel engines with batteries to achieve greater fuel efficiency and lower emissions.

**Methanol conversion:** We are engaged in retrofitting projects where methanol propulsion systems are being installed in existing vessels, demonstrating our ability to transform existing vessels into zero-carbon emission champions.

PJ Circular Engineering har siden 1979 specialiseret sig i cirkulær vedligeholdelse af kritiske motorkomponenter som turboladere, brændstofdstyr og regulatorer. Vores klassegodkendte procedurer sikrer høj kvalitet og reduceret klimaaftryk. Ved at vælge cirkulær vedligeholdelse med os bidrager du til at nedbringe dine emissioner. Vi er autoriseret af producenter som Woodward, KBB og MET-turbo.
